

# Garlic 5,000

Category: Garlic; Immune System Support

- 5,000 mcg of Allicin Potential
- Odor-Controlled & Enteric-Coated
- One Tablet Per Day
- Immune System Support\*

Item 1814 – 90 Tablets

**Positioning Purpose:** Garlic has long been revered in the natural health community for its beneficial natural compounds including allicin, the component long thought to provide many of this popular herb's health benefits. However, allicin is naturally unstable and can be easily destroyed during digestion or by other bodily fluids. Researchers have found that by focusing on certain allicin precursors - such as the enzyme alliinase and another compound, alliin - the body can be supplied with the raw materials it needs to produce allicin, thereby increasing this natural compound's effectiveness in the body while bypassing acidic digestive conditions and bodily fluids that can reduce or eliminate its effectiveness. In addition, enteric-coating technology can help protect garlic and its fragile components from harsh stomach acid, delivering them to the intestinal tract where they're more effective.

**Product Description:** Our new Garlic 5000 Tablets have been formulated utilizing the latest knowledge regarding garlic. This specialized garlic supplement is standardized to yield specific allicin precursors, which convert to allicin when ingested. In addition, Garlic 5000 Tablets are enteric-coated so the conversion to allicin occurs in the upper intestine. This not only provides optimal absorption but protects against garlic's pungent odor as well. The allicin precursor levels in Garlic 5000 Tablets are achieved through a special process that keeps garlic moisture low. This unique process was developed by NOW's Method Development Group and took almost two years of research, development, and testing before the process was perfected to the point that we could guarantee 5,000 mcg allicin potential per tablet. This process also allows us to maintain allicin potential while preserving all of the natural goodness found in whole, fresh garlic.

**Ingredients:** Odor-Controlled Garlic (*Allium sativum*) (Bulb) 500 mg (minimum 5,000 mcg Allicin potential per tablet). Other Ingredients: Cellulose, Enteric Coating, Croscarmellose Sodium, Stearic Acid (vegetable source), Magnesium Stearate (vegetable source) and Silica.

**Ideal Users:** Adults seeking a natural means to support healthy immune system function, or a supplemental form of garlic that provides the benefits without the usual perception of odor or the stomach irritation that can sometimes occur with Garlic.

**Recommended Use:** As a dietary supplement, take one tablet daily with a meal.

**Also Consider Taking:** Hawthorn Extract, Immune Renew™, and Chlorophyll.

**Supporting Science:** N/A

**Additional Information:** For adults only. Consult physician if pregnant/nursing, taking medication, or have a medical condition. Keep out of reach of children.
